Hello,

is there any option to create a custom addon/plugin for Data Warrior?

My use case is:

- 1. User clicks a new added menu item "Open research database"
- 2. User enters login information
- 3. A list of custom searches is displayed to the user from the 3d party system
- 4. After selection of the search, a web service is called, which generated an sd-file
- 5. the generated sd-file is loaded into Data Warrior

Many thanks in advance!

Andriy
