Subject: Re: PCA Posted by thomas on Wed, 11 Jul 2018 13:30:13 GMT View Forum Message <> Reply to Message

A small update: I just added a checkbox in the PCA dialog that allows to open an additional window after PCA calculation showing a table with the originally selected variables in rows and their Eigen values in columns. Plots of scores and loadings are equivalent to this example: https://learnche.org/pid/latent-variable-modelling/principal -component-analysis/interpreting-score-plots-and-loading-plots

Thus, the next version will have it.

Thomas
