Right on the spot I would like to suggest to you to deposit this question on Stackexchange Chemistry (<https://chemistry.stackexchange.com/>) which has a broad spectrum of readers. Because users may gauge their interest to special topics, you may increase the likelihood of assistance by adding labels relevant to your question (tags), for example «polymers», «computational chemistry», «solubility», «molecular-dynamics». If you may demonstrate briefly what you tried on your own to solve the problem, chances are even higher to find help.

As by today, the abbreviated search for «polymer*» .AND. «solub*» yields 113 posts (https://chemistry.stackexchange.com/search?q=polymer*+solub*), so try it.

Good luck,
Norwid
