Thanks Thomas, I've looked at my file again in more detail and noticed something odd. If the view is small, I can see the r-grps (attached image rgrp_minimised) but only the vertical lines of the grid (view set to show full grid). If I maximise this window the r-grps disappear and I lose the whole grid (rgrp_maximised). I've included an example dwar file from ChemBL where this behaviour occurs with R5 on the x-axis. Any thoughts how to deal with this?

Thanks,

Angus
