Firefox Quantum v-58.0 (64bit)

Debian Stretch

I have just installed Datawarrior v-4.7.2., openjdk-8-jre and openjfx.

Unfortunately, when I attempt starting the program I get the following:

This XML file does not appear to have any style information associated with it. The document tree is shown below.

```
<mime-info><mime-type type="application/vnd.openmolecules.dwar"><comment
xml:lang="en">DataWarrior Document</comment><glob pattern="*.dwar"/><glob
pattern="*.ode"/></mime-type><mime-type
type="application/vnd.openmolecules.dwat"><comment xml:lang="en">DataWarrior
Template</comment><magic priority="50"><match type="string" value="datawarrior properties"
offset="1"/></magic><glob pattern="*.dwat"/><glob pattern="*.odt"/></mime-type><mime-type
type="application/vnd.openmolecules.dwaq"><comment xml:lang="en">DataWarrior OSIRIS
Query</comment><magic priority="50"><match type="string" value="osiris query"
offset="1"/></magic><glob pattern="*.dwaq"/><glob pattern="*.odq"/></mime-type><mime-type
type="application/vnd.openmolecules.dwas"><comment xml:lang="en">DataWarrior Self
Organized Map</comment><magic priority="50"><match type="string" value="datawarrior SOM"
offset="1"/></magic><glob pattern="*.dwas"/><glob pattern="*.som"/></mime-type><mime-type
type="application/vnd.openmolecules.dwam"><comment xml:lang="en">DataWarrior Task
Sequence</comment><magic priority="50"><match type="string" value="datawarrior macro"
offset="1"/></magic><glob pattern="*.dwam"/></mime-type><mime-type
type="application/vnd.openmolecules.sdf"><comment xml:lang="en">MDL Substance Definition
File</comment><magic priority="50"><match type="string" value="M "
offset="0:180"/></magic><glob pattern="*.sdf"/></mime-type></mime-info>
```

Assistance will be much appreciated.

Thanks in advance

it seems you open the datawarrior.xml file for some reason in the browser. DataWarrior is not a browser application and to start the program you should execute the shell script '/opt/datawarrior/datawarrior' or any file link associated with it. You may try opening a shell and type 'cd /opt/datawarrior', then type './datawarrior'. See. whether you still get an error. If not and if the program starts.

Thomas
