Subject: Case sensitivity in merge function

Is there a way to turn on/off case sensitivity for the merge keys during a merge of two datafiles?
I'd like to write a macro that merges chemical properties of monomers calculated in another
dataset, but one of my original dataset uses capital and lowercase letters while the other does not.

Currently there is no way, but you are not the only one to ask for this.
It will be part of the update that is due for December.

Thomas
