Subject: Re: Remove 'abs' and other chiral center labels in structure depiction Posted by thomas on Sun, 13 Sep 2020 10:13:14 GMT View Forum Message <> Reply to Message

Looks OK to me. One should be aware that in case of multiple stereo centers informarmation may be lost, e.g. in case of epimers. The 'stereo display mode' can be combined with the 'color display mode' as patent layers seem to prefer black & white structures with no stereo labels.
