Hi Thomas

I think the REOS rules by Pat Walters & colleagues from Vertex (<https://www.sciencedirect.com/science/article/abs/pii/S135964469701163X?via%3Dihub>) are substantially easier to implement (but also well-established) since they were written as SMARTS and there are 'only' 117. I can provide you with the list if you are interested.

Cheers/Evert
