Subject: Re: Merge File: Source column not defined
Posted by thomas on Wed, 28 Oct 2015 20:11:38 GMT

I tried to reproduce with two example files. If the title line of the 2nd file ended with a column delimiter (TAB or comma), then I had the same effect: The dialog shows an additional line ('Assign' without a column name) and the error message. If you remove the TAB (or comma) or add a column name in your csv file, then it should work.
