sorry for the late reply. I have been in vacation.

I have tried copying with version 5.5.0 and could not reproduce.
I checked the error message and found that there was a fix of a related problem in April.

I suggest that you download the current development update from https://openmolecules.org/datawarrior/dw550x.zip, unpack it and replace /opt/datawarrior/datawarrior.jar with the new one from the archive.
I assume that the problem is solved then. If not, please send me a small file and instructions what to select, copy, paste to reproduce.

Thomas
