Hi,  
If it's of use, I have created a formula in DataWarrior that calculates the BBB Score using the methodology from the original published article.  
One has to enter or paste values for 'Aromatic Rings', 'Non-H Atoms', 'Molweight', 'H-Acceptors', 'H-Donors', 'Polar Surface Area', and 'pKa', and then update the formula and re-calculate the score.  
Regards,  
Tim Ritchie.
