Dear Jon,

as soon as you have a running installation of DataWarrior,[1] a click on «I have read and understood the disclaimer» opens a new menu to provide access to the development versions with the .jar to substitute for improved functionality. Depending on the operating system available to you, this either is the archive for Mac/Linux,[2] or for Windows.[3] At present, the current development version was prepared Pi day, 2022-03-14.

Norwid
