Dear Vijay,

addressing point 1) and a set of locally defined molecules to use the «copy new image» from a structure view, the export of structures and annotations as .png, or .svg worked well for me. Both exported illustrations contain a representation of the structure and the property previously selected:

The files exported were read easily by inkscape.[1] Here, I opted for the .png with a solid white background, though it is possible to opt-in for a transparent one. These observations refer to DW 5.5.0 for Linux in Debian 12/bookworm (branch testing) including DW's update by May 13, 2022. Thus, to ease replication of your problem, may you state the DW version you use and share a minimal .dwar file?

Norwid
