Subject: Re: macro buildEvolutionaryLibrary from a mac terminal
Posted by Bruno on Mon, 06 Jun 2022 09:21:39 GMT

Thanks Thomas
yes it was a copy and paste, but here is a similar macro directly saved from Datawarrior (dwam).
It runs fine when started with the app, but not from my terminal, with the terminal it opens the
Osiris window but does not start the process as if i was missing a command.
Best
Bruno
