Subject: Copy Images and Statistical value

Hi, I am using datawarrior under both Linux and Windows.

I knew there were the function to copy images and statistical values, e.g. from a line fit. I knew I used it frequently and I think it was a right click in the upper bar. But I only get a "hand" symbol and no right click.

Ctrl shift copy works to copy an image, but without the sizing. Copy produces an error message (active view doesn't support copying", also if I right click on the top bar of an image if it is maximised "uncaught exception: component not found in tabbed pane"

Can somebody help?

Achim
