Subject: Link to oracle per row Posted by de\_maas on Fri, 17 Feb 2023 16:28:49 GMT

Hi All,

I want to retrieve data from my oracle database using an id stored in my Datawarrior file. Is it possible to pass a identifier to the SQL somehow? I tried this but it isn't working:

SELECT AVAILABILITY
FROM availability\_info
WHERE description=\$idnumber

I can't find the right synthax to do this. Same goes for the URL.

Thanks,

Peter
