Subject: Add reaction from structure

Hi I'm beginner of datawarrior.
It is a good software to analyze chemical data.
But I have a problem.

I have over 100 building blocks, and I want to add a same reaction to all that building blocks.
But when I'm trying to add a reaction, I have to make a reaction column then, draw the reaction to each structures.
This takes too long time :(

Can I apply one reaction to that all structures?
Tell me the way to deal with this problem.

Thank you
