Subject: Bypass "Maximum number of open filters reached." message on file open?

When opening a .sdf, it seems that DataWarrior tries to create a filter for every column. I am running a macro that opens a file and applies a template with the filters I want. However, my original .sdf has grown large enough that I now receive the message "Maximum number of open filters reached" whenever I open the file.

Is there any way, either as an option on file open (something like "do not create filters") or as part of a macro (disable/ignore/accept warning messages) to suppress this message and proceed with the macro?

Thank you!
Andrew
