Subject: .csv file cannot open DIRECTLY in Version 6

Hello,

Windows Version 6 Data Warrior Issue

I've encountered an issue with the newly released Version 6 of the software. It seems I can no longer open .csv files directly by right-clicking and selecting "Open with Data Warrior," as demonstrated in Image 001.

However, opening the same .csv file directly through the Data Warrior application works fine.

This right-click and "Open with DW" workflow functioned correctly in Version 5.5. So, I'm wondering if there are any updates or changes I should be aware of?

Thank you!
