From your error message I assume that a button image of one of the 'Save' dialogs buttons was not found. This suggests that a file is damaged, the JRE is somehow not consistent or a file path used by the JRE is wrong. I suggest to try the following:

Uninstall DataWarrior from the control panel, then manually delete the 'c:\Program Files\DataWarrior' folder, if it is still there. Then freshly install DataWarrior using the current 6.1.0 installer. If that doesn't solve the issue, then do the following:

Download openmolecules.org/datawarrior/datawarrior610_d.zip, unzip it and copy the file you get into 'c:\Program Files\DataWarrior'. Then open a command window, cd to that folder and type 'DataWarrior_d.exe'. Post any error messages that you get...
