open newly install DataWarrior 6.1.0 in CentosStream 8(4.18.0-490.el8.x86_64) for the first time
will still show the update reminder msg as attached.

Dear DataWarrior User,

This message is for you, if you didn't update yet to version 6.1.0!

Now version 6.1.0 is out. We intended this to be an automatic update,
but fixing an issue regarding search, highlighting, and navigation in
the help window requires a change in the VM-options and therefore you
need to update manually again:

1. Click 'More...' and download the DataWarrior installer v6.1.0 from the website
that opens in your web browser (openmolecules.org/datawarrior/download.html)
2. Uninstall version 6.0.0
3. Install version 6.1.0 using the downloaded installer

We appologize for the inconvenience.
(This message won't be shown again, unless you open it from the Help menu)
