Subject: How to customize Merge Equivalent Rows

Hi Thomas,

Datawarrior is a very useful open-source cheminformatics tools. Thanks for sharing it.

We wanted to use it organize experiment data by merging different assay results. When we used merge equivalent rows, we found that except for selected column(s) for equivalent check, other columns with the same values were also merged as a single value. Can we keep them individual or modify this function to let user determine whether merging equivalent values?

Many thanks!

Yuan
