Subject: Issue executing DataWarrior Posted by Tech01 on Fri, 24 May 2024 20:03:02 GMT View Forum Message <> Reply to Message

Freshly installed DataWarrior, no error during installation, checked the box Launch DataWarrior and clicked Finished. DataWarrior doesn't launch.

Tried to launch with Administrator rights, same issue. Nothing show up on the Task bar and in the Task Manager I don't see any application relating to DW.

Event Viewer:

- Exception Code: 0xc0000005
- Fault Offset: 0x000000000046b20
- Faulting Process ID: 0x4394

Any clue?
