It seems that the file-open dialog cannot access the icon images for some reason, which I don't understand.
Can you start DataWarrior directly using its JRE21 and see, whether you get a stack trace?
Maybe we learn something from that.

In a command window type this:

"c:\Program Files\DataWarrior\jre\bin\java" -jar
c:\ProgramData\DataWarrior\datawarrior_v06.03.00.jar
