View Forum Message <> Reply to Message

Right away I get this message, but the program opens: Added missing 'C:\Program Files\DataWarrior\jre\bin;' to JRE property 'java.library.path'.

Then, when I try to open a file again, I get this message in cmd:
java.lang.NullPointerException: Cannot invoke "java.awt.Image.getWidth(java.awt.image.ImageObserver)" because "<local6>" is null
