Subject: Docking with DW on Mac

Hello
i am running DW on a Macbook metal (OS = Ventura), all DW commands (v06.04.02 - built March 2025) work ok but Dock structures...The window shows up but then the right mouse click does nothing on my machine, i have no mouse but the right mouse is usually via the control key and pad.
Not sure if other users have this problem on a Mac? Could it be the OS?
Many thanks
