
Subject: Round numbers by decimal places?

Is there a simple way to round numbers by decimal places rather than significant figures? I have a column with values that range from 1 to several digits (first list below), and I want to round them as shown in the 2nd list.

Perhaps a find and replace search?

Thanks!

1.1
11.2
11.6
101.2
101.6

Round to:

1
11
12
101
102
