Hi Alfred,

1st question: a dialog to show/hide multiple columns at once is on the (very large) list of new features, but not available yet.

2nd question: It seemed to me that a category filter beyond a certain number of categories would not be practical anymore. Thus, there are maximum category counts for different purposes, e.g. to decide whether a category filter still makes sense. These numbers are hard-coded into the program and cannot be changed from outside.

Thomas
