Hi Johanne,

thank you for sending the file. The problem was an invalid setting for the splitting proportion between data area and filter area. I updated DataWarrior allow and correct invalid values. You may download updated files from [openmolecules.org/datawarrior/dw500win.zip](http://openmolecules.org/datawarrior/dw500win.zip) or [openmolecules.org/datawarrior/dw500x.zip](http://openmolecules.org/datawarrior/dw500x.zip) (Windows or Mac/Linux).

Sorry for the inconvenience. Alternatively you may open your dwar file in a text editor and replace the line close to the end:

`<rightSplitting="1.2609">`

with

`<rightSplitting="1.0">`

That would also do it,

Thomas
