Hi Craig,

sorry this slipped my attention. The category functions were simplified during recent months to only use two parameters. The official version 5.2.1 still uses the 3 parameter form. Under this link you always find about weekly releases of replacement files of the most recent development cycle: [openmolecules/datawarrior/dw521win.zip](#) (Windows) and [dw521x.zip](#) (Mac/Linux). They have many fixes, new features, but often not up-to-date manual pages. And new features are sometimes in experimental state.

Best wishes, Thomas
