Hello,

I was excited to try out the new DW v5.0.0 but noticed some functionality that seems to have changed or disappeared. In DW v4.7.2 you could clear (uncheck) all category filters by right clicking and choosing "Uncheck all". This is very handy when you have a lot of category filters and don't want to check/uncheck them one-at-a-time.

Thanks for creating and sharing a great open use tool!

Greg

hmm, I have a tendency to find answers to my own questions when I re-install... this time all the check filters work just fine. I don't know what happened the first time, but now I am happily clearing/unclearing all checks on my category filters.
