Dear Thomas,

When attempting to download the Datawarrior installer for windows, I'm directed to a Dropbox folder and redirected to 'h-t-t-p-s://uc101fa64a23ff6403e25567425f.dl.dropboxusercontent.com/cd/0/get/AdEYCx-XWGG6Z7wLJloVJZDqAwy4aYFpodWntsa99mnX_FiMwldrPYINVOLITPFbRh-oR-DhC8DQxGkiXVR2J8n0oMjJOxtk0j2vwsEy_p9kp-Ax4xZjqWg3noo_5JwHAmA/file?dl=1#'

The window displays following error :
This page can't be displayed

- Make sure the web address 'h-t-t-p-s://uc101fa64a23ff6403e25567425f.dl.dropboxusercontent.com' is correct.
- Look for the page with your search engine.
- Refresh the page in a few minutes.

... with a button : Fix connection problems.

It's not a firewall issue, I think, because I can access my personal Dropbox folder without any problem. Do you have a suggestion ?
p.s. had to camouflage the links

Thank you

Dear Bart,

to be honest, I don't really have an answer for this. I just tried to download the windows msi by pasting the link
<https://www.dropbox.com/s/z7n5oz1zcu84vny/datawarrior500.msi?dl=1>
into the URL field of Firefox on a Macintosh, which directly started the download. I can only suggest to try a different browser, different operating system or from within a different network. Something is interfering...

Good luck, Thomas
