This morning I updated DW to version 5.2.0 and now Alt+scroll wheel doesn't not allow me orizontla scroll of pages. Is this a bug of mine or can be reproduced? Is it a change purposely made?
Thanks.

A

Horizontal scrolling with Alt-scroll-wheel was never intentionally supported. It may be that your operating system or the substance look&feel provided the support for the Java JTable. One of the available look&feel options was removed in the current version, because it had a bug related to selected cells, which caused large files to get unresponsive. Anyway, the next update will probably migrate to a much newer JRE and substance look&feel. It may be that Alt-wheel support will be back then.
