Is it possible to have background colors applied to a column between a range of values? I see how the background colors can be applied lets say from a value of 0 to 5 with 0 being green and anything 5 or above being red. What I'd like to do is to color the backgrounds for values less than 1 red, and values between 1 and 5 green, and values above 5 being red again? Or in other words when the value is between 1 and 5, the back ground should be green. All other values the background should be red. It doesn't look like this can be done in Datawarrior.

Thanks,
Ed Fritzen

You can't do that directly, but if you calculate a new column with formula "if(cLogP<1,0,if(cLogP>5,0,1))" (assuming that your value column's name is 'cLogP', the new column contains a 1 for cLopP values in the 1-5 range. You can use that new column to color the cLogP column's cells.
