Hi all,

Just wonder if anyone could point me to a way to attach an image or pdf file to an entry?

I'm looking to add LCMS spectra to some compounds, and it seems that this could be done as embedded data ("Table with green detail markers indicating file-embedded detail text and pictures"). I have looked through the manual, but haven't found the way to embed data.

Any help would be much appreciated.

Giang

Hi Giang,

Like adding hyperlinks to data, it seems that adding images is a "possible, but not through the GUI" feature of DataWarrior. Thomas has a detailed post describing the procedure:  
[https://openmolecules.org/forum/index.php?t=msg&goto=306&&srch=image#msg\\_306](https://openmolecules.org/forum/index.php?t=msg&goto=306&&srch=image#msg_306)

Hope that helps!

Andrew

Thanks Andrew.

That's very useful. I'll give it a go.

Hi Giang,

you could also define a column to contain URLs or parts of an URL, e.g. a name, if an URL exists that allows lookup of the name. DataWarrior uses this mechanism for Googlepatent search results

and for the Wikipedia compound list. If you do that, you have a column that contains complete URLs or just names as clickable links. Once you click any, your default browser open the link. The mechanism is explained in [https://openmolecules.org/forum/index.php?t=msg&goto=729&&srch=url#msg\\_729](https://openmolecules.org/forum/index.php?t=msg&goto=729&&srch=url#msg_729)

Older DataWarrior (before 550) don't display links as clickable link (blue and underlined once the mouse pointer is over it), but they still can be opened with a right mouse click and 'Open ... in Web Browser'.

Thomas
