
Subject: importing data to the existing datasheet from txt or xls

Dear Openmolecules Team,
Thank you for the great software.

I'd like to append data from the text or xls file to the column within existing datasheet. Using Ctrl+C/Ctrl+V creates the new datasheet, which is not what I want.

Best wishes,
Alex

Dear Alex,

using 'Append File...' from the File menu allows to append text files or DataWarrior files.
If you intend to append an Excel file, you may use copy/paste to create a DataWarrior document, save it and append it then to another open DataWarrior file.

Thomas
