I'm datawarrior starter :)

I want to open .csv file which has smiles.

But when I opened it, the letters became weired like attached image.

I use windows 10 and datawarrior ver5.5.0.

Please someone help this problem

Something seems wrong with the encoding.

You could try to select all smiles in Excel,

copy then and choose 'paste without header' in DataWarrior.

That should create a new Window with Smiles and recognized structures...
