Subject: DW 6.1 Windows version can not be installed

Hi,

I downloaded 6.1, but installation is rejected by Microsoft Defender SmartScreen. While for v6.0, the installation is straight forward.
I checked the MD5 key and confirmed it is acb59ccdc1ba9ff98344869ad1287802.
Can you help check?

I didn't see this issue yet. Can you switch off the Defender during the installation? About 300 people are using v6.1 already, many of them on Windows 10 and 11. Thus, there should be an obvious solution.

Thanks for the suggestion, but I can not turn off the Defender SmartScreen due to company IT policy.
I want to repeat, for v6.0, the installation is successful. So I guess there is something changed.
