Installer says 6.10, but the DW splash screen says 6.01.00, echoed by the about DW window.

Both say Built 24 Jan 2024.

Seems to be a purely cosmetic issue, so far.

Thanks,

Paul

For the Windows version, I should add.

Dear Paul,

I speculate v06.01.00 (on the splash screen) follows a semantic versioning,* which for brevity was condensed trimming leading zeroes and skipping some full stops otherwise indicating the start of a file extension (e.g., `.txt`). Because the name of the installer for Linux is named similarly `datawarrior610.tar.gz` (instead of a `datawarrior06.01.00.tar.gz`); where `.tar.gz` are two typical file extensions of a compressed file archive in this family of OSes.

* in reference to https://semver.org/

Best regards,

Norwid

I see the same issue using Mac OS 10.15.7 but the program seems to run ok.

Ed

This was also true in 5.05 which said 5.50 on the splash screen.
It's tradition :)
