Subject: Problem when opening two .dwar

Hello,

After upgrading to v6.01, we have noticed that it is impossible to open two .dwar files at the same time.

You can open the first .dwar normally, but if you want to open a second one, it won't open.

This bug was not present in v6.

Has it been reported to your support team?

Best Regards,

Adrien ALONSO

Hallo Adrien,

this is a Windows only problem. When DataWarrior is already open and a dwar file is double clicked, then that file does not open. Opening the file from the DataWarrior 'File' menu, however, works. We are investigating the matter...

Thank you for reporting...
