Hi,

I just updated datawarrior to 6.02 via the automatic updater. In the new version some of the buttons are not displayed correctly on my machine (windows 10):

Open and close buttons on the table pane

Buttons next to filters:

I'll try reinstalling from scratch later today to see if that makes a difference.

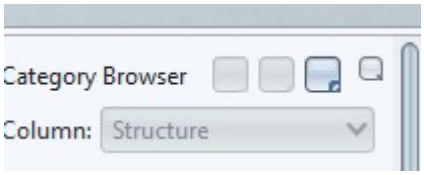

Best,
--
Wim

Thanks for reporting. I could reproduce this. It seems to happen if the primary monitor is using a scaling larger than 100%. Expect a fix soon...

Thanks Thomas,
The latest update fixed the issue. Much appreciated.
