Subject: Problem with Visualizations

Hi,

I'm new to DataWarrior and going through the Tutorial. Everything works fine until I get to Step 4: visualizations. Here, the right-click in a cell opens a pop-up menu, which does not provide the option "Show/Hide Size Labels". The right-click in the Structure view title bar does not open any pop-up menu, so I cannot create any 2D/3D visualizations.

I'm using Version v06.02.05 on linux (Kubuntu 24.04). I also tried V06.01.00 on macOS Sonoma and have the same issue.

Could you please provide some help?
Thank you in advance!
Ute

Sorry, I found the corresponding symbols (wrench and +) myself now! Would be great to update the help and the tutorial :)
Thank you,
Ute

Hello Ute,

the source of DataWarrior is public on GitHub (parts of the documentation for instance in path https://github.com/thsa/datawarrior/tree/master/src/html/hel p).

Regards,

Norwid
