Hi,

Thanks for the fantastic software that Datawarrior is. Sorry to post another topic about the ChemAxon pKa plugin.

I'm running a Macbook Air 2024 chip M3 on MacOS Sequoia 15.0 and DataWarrior v06.02.05.

I have an official academic license for Marvin Suite (the Marvin application runs fine) and I downloaded capka.jar from <https://chemaxon.com/download?dl=%2Fdata%2Fdownload%2Fcalculators%2F.datawarrior%2Fcapka.jar>.

However, no matter where I place the capka.jar file in the DataWarrior application directory, it doesn't activate the pKa calculation.

From what I've read in this forum, the directory /Applications/DataWarrior.app/Contents/PlugIns/universal.jre /Contents seems to be the right one, but like I said, it doesn't work.

Am I missing something? What is the correct path to put the capka.jar file? Do I have to do anything else?

Sincerely,

Vitruves

On MacOS capka.jar should go into /Applications/DataWarrior.app/Contents/Java
