
Subject: "Don't group, connect all" Feature in DataWarrior

According to the help documentation, there is an option labeled "<Don't group, connect all>" which allows users to connect all points in both 2D and 3D views with lines. However, I have been unable to find this option in the current version of the software.

I am wondering if this feature has been removed or relocated within the interface. The ability to connect all points without grouping would be incredibly beneficial for my current project, and I am eager to utilize this functionality.

Could you please advise if this feature is still available, and if so, where I might find it? If it has been discontinued, I would appreciate knowing if there are any alternative methods or upcoming updates that would allow me to achieve a similar result.

thank you for noticing. The 'connect all' option will be back in the next update. It disappeared unnoticed and unintended during a code refactoring...
