Hi,
After I updated my OS, I am having a problem opening DataWarrior.
It shows an warning sign showing,
"Apple could not verify “DataWarrior” is free of malware that may harm your Mac or compromise your privacy".

Below is the crash report.
p/s : My laptop (MacBook Pro) works fine.
I would appreciate any help.
Thanks

I updated my MacBookAir M2 today to Sequoia 15.0.1. DataWarrior launches without any issue. Thus, there is no general issue. I did some googling and found a similar issue Firefox (SIGKILL (Code Signature Invalid)). Maybe, you can resolve the issue in a similar way...

Thank you for the info.
Based on the discussion, I used /Applications/DataWarrior.app/Contents/MacOS/DataWarrior in the terminal and it worked.
Still opening it from Application gives me a crash.

My laptop does not give me this issue, working fine.. Only my iMac (Retina 5K, 27-inch, 2019) crashes.

Thanks
