Subject: Text filter with a list of #'s

Hello,

Sorry if this has already been asked and answered, but is there a simple way to paste/search a series of values (e.g., cmpd numbers) into a text filter without inserting commas after each #?

Thanks,

VS

No, a text filter needs the commas as separators to understand, that your intention is to filter by any of them with an OR-logic, rather than filtering by the entire string.
